conjectPM – Easily find, access, sign-off and distribute project documents

Anytime, anywhere access to project documents

conjectPM is accessible via **Internet**. You receive a **personal log-in**, which ensures a personal view into your project.

You conject account allows you to participate in an **unlimited number of projects** and allocate **unlimited disk space** at no extra costs.

Documents can be found via **full text search** (like Google search) or via **structured search** by key words.

Recurring searches can be stored as **personal filters** and enable **dynamic views** into the project.

Efficiently store and edit project documents

Project related **drawing keys** enable automatic storage of project documents, notification of the specified recipient group, allocation of respective user rights and adjustment of the index in the document history.

The **Online Viewer** shows and compares the content of over 200 common file formats from the CAD and office world.

Mark Ups show change requests visually

Lock-function prevents accidental parallel changes of documents.

Effectively sign-off and distribute project documents

The **sign-off workflow** provides participants access to the relevant project status and information and enables process automation and tracking.

The **traffic-light-function** visualizes the document status and provides a quick overview of signed-off documents.

Notifications are automatically sent to relevant participants when a new document or version is available.

The **plan-distribution feature** enables forwarding of drawings to internal and external participants as well as reprography services.

conjectPM – Stay on top of your project, track decisions and communicate fast

Track all decisions

conjectPM creates a **revision-proof project file** of documents, drawings, versions, distribution lists, communication and other relevant project activities automatically. Documents can be always accessed within their **context**.

The **webcam** function enables documentation of progress on the construction site. All snapshots are part of the progress documentation.

A **digital archive** can be stored on any media, such as DVD, CD or hard disk. The online data can remain online indefinitely.

Communication all in one place

conjectPM ensures a **comfortable, efficient and reproducible** form of **project communication**.

You can send **emails** and **faxes** directly from conjectPM - even to external participants.

Online meeting enables information exchange and desktop sharing within virtual conference rooms – for up to 20 participants.

All communication is logged as part of the final **project file**.

Manage RFQs

Individual workflows support the RFQ process.

Initially all bidders receive bidding documents and provide **offer data** electronically. Data can be kept locked until the final date, if desired.

A **price comparison** allows a quick overview of incoming offers enabling a fast decision-making process.

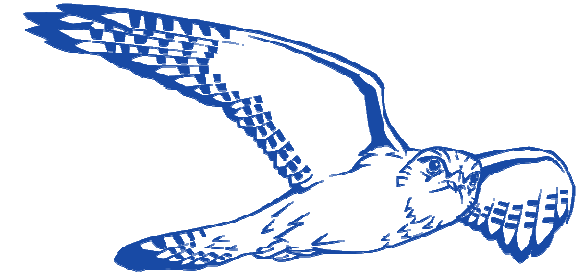

The current **RFQ status** and **bidder activities** are fully integrated in **conjectPM**.

Quick Start

conjectPM is available On Demand at the push of a button. Use a default configuration or easily configure conjectPM to meet your specific project needs.

In addition, conject has a team of experience consultants who are happy to advise you and support you on your individual requirements.

References

conjectPM has been thoroughly tested in major construction projects. Some highlights from our reference list:

Allianz, Arabella Sheraton, BMW, Bouwfonds MAB, Commerz Grundbesitz, Coop Himmelb(l)au, DaimlerChrysler, Deka Immobilien, Deutsche Bank, ECE, Fraport, HOCHTIEF, IKEA, Lufthansa, Multi Development, MGG, Rolls-Royce, Sonea Sierra, Thyssen Krupp

Success with conject

conject operates Europe's on-demand platform for the construction and real estate sector. All core business processes in Infrastructure Lifecycle management (ILM) are supported. conject ILM spans the entire lifecycle of a building – from development, to planning, through construction, and on to operation and commercial use.

Today over 3,000 companies and more than 60,000 users are successful thanks to conject – including 60 percent of the DAX 30. With headquarter in Munich, conject has offices in Duisburg, Dresden, St. Petersburg, The Hague, Boston and Dubai.
