conject

1 Recommended system architectures

1.1 3-tier architecture

On the client PC no data of conjecCM is stored. The user logs on to the application server on which conjecCM is located via remote desktop connection (RDP). The required database is located on a separate database server.

1.2 2-tier architecture

conjecCM is installed on the client PC of each user. The clients have a direct connection to the database server. The users start conjecCM on the client PC.

2 System requirements

Group/Component		Client PC	Application server	Database server
Hardware	CPU	> 1 GHz	> 2 GHz	
	Random access memory	> 256 MB RAM	> 1 GB RAM	
	Graphic card	XVGA Graphics	minimum SVGA Graphics	
	Hard disk	> 250 MB free space	> 50 GB free space	
	Physical device	CD ROM device	DVD device	
	Others	-	IDE RAID 1	
Software	Operation system *	Microsoft Windows XP	Microsoft Windows Server 2003	
		Microsoft Vista	Microsoft Windows Server 2008	
		Microsoft Windows 7	Microsoft Windows Server 2008 R2	
	Oracle	Oracle Client 9.2.0.4 **		Oracle Server 9.2.0.4
		Oracle Client 10.2.0.1 **		Oracle Server 10.2.0.1
	Microsoft Office	Microsoft Office 97 up to 2007 **		-
	Other software	Microsoft XML Parser 4.0 Service Pack 2 **		-
Microsoft .NET Framework 3.5 **		-		

* : including latest service pack

** : on client PC only on 2-tier architecture
