### **New iPhone application makes conject mobile Project documents can be viewed and sent away in seconds**

**Dubai, UAE, 20 October 2009 – conject, the global software provider for the management of the entire Infrastructure Lifecycle Management (ILM) of construction projects, recently announced the first iPhone-application (conject App) for the real estate industry.**

With this brand new and free to download applet, iPhone users can now get direct access to all the important data concerning their building projects stored on the conject platform. The applet allows users to view or send drawings, documents, workflows in seconds from their iPhone. "It is extremely easy and convenient", says Dr. Uwe Forgber, director conject Dubai, and explains: "You download the conject applet from our site, click on it, and you will see the world map and can open your project and the according folders or documents in only five seconds."

The new application allows users a full overview of their projects. No need for a laptop or netbook, no extra help from the office is necessary. "As the world is getting more mobile, this is a very convenient way to stay perfectly updated", adds Forgber. He himself has witnessed the advantages of the applet, as he travels frequently around the world and now is completely up to date via his iPhone. Conject views this as a must have tool for all business men who work internationally, attending conferences, fairs or are in meetings or at a remote construction site.

An additional benefit is the fact that all information is tracked. Every transaction made via the applet is securely documented, which allows for a complete activity history of any project.

**About conject**

conject, an internationally operating German software house, with over twenty-five years of experience, provides business process management solutions for the real estate and construction industries. Focused on encompassing and delivering on all aspects of the Infrastructure Lifecycle Management (ILM), conject develops and manages on-demand, web-based software platforms. Especially in the Golf Region, there is now a huge demand for Facility Lifecycle Management (FLM). Since its establishment, over 3,000 corporate customers and 60,000 users rely on conject with an increasing number of flagship projects for major corporations such as Dubai World Central, 1st Qatar, Millennium Development International and Adidas Middle East. conject currently has offices in Germany (Munich, Duisburg, Dresden), Middle East (Dubai), Netherlands (Den Haag), Russia (St. Petersburg) and USA (Boston). For more information please visit: [www.conject.com](http://www.conject.com).
